Problem Solving

Attention to Detail

Time Management

Hassan Khan

Node JS Developer

Professional Summary

Accomplished Node.js Developer with expertise in server-side application development, API integration, and data management. Proficient in JavaScript, RESTful APIs, and database optimization. Demonstrated ability to rapidly master new technologies, including leveraging Generative AI to innovate and improve backend system performance. Known for optimizing performance, ensuring scalability, and driving continuous improvement in development processes.

Experience

CTGTI Pvt Ltd | Software Developer August 2023-present

- Designed and built a scalable ATS platform using Node.js and Express, ensuring robust handling of job management, candidate tracking, and user roles.
- Optimized backend performance to handle an increasing number of applications and users, as well as secure applicant data storage in MongoDB. Also handled data migration, environmental updates, and complete codebase refactoring.
- Integrated AI features such as resume parsing and watermarking to improve platform functionality, and also managed cronjobs.
- Promoted team collaboration and continuous platform improvement, demonstrating excellent communication and problem-solving skills.

Projects

HTML5

CSS3

JavaScript

MongoDB

Express.js

Node.js

WebRTC

Web Sockets

Redis

RESTful APIs

- Developed user authentication (Sign-in / Sign-up) ensuring secure access.
- Implemented chat functionality, facilitating real-time communication using Web Sockets.
- Implemented a feature to track expenses, enabling users to record, categorize, and analyze their spending for better financial management.
- Collaborated on database management using MongoDB for efficient data storage and retrieval.
